Description

It seems after a container is created, it is not indexed.

There is a error in log:

WARN 2012-05-21 14:05:02,089 (PhaidraOperationsImpl) Caught exception during operation - calling upstream's OperationsImpl to get the datastream the traditional way. Exception was: dk.defxws.fedoragsearch.server.errors.GenericSearchException: Mon May 21 14:05:02 CEST 2012 Error during XPath query: java.lang.NullPointerException
WARN 2012-05-21 14:05:02,179 (GenericOperationsImpl) exception and empty index field from getDatastreamText mimetype pid=o:107203 dsId=OCTETS mimetype= exception=fedora.server.errors.DatastreamNotFoundException: [DefaulAccess] No datastream could be returned. Either there is no datastream for the digital object "o:107203" with datastream ID of "OCTETS " OR there are no datastreams that match the specified date/time value of "null " .
